## **Bogatoj**

He wrote a significant treatise on the subject of projective geometry at the age of sixteen, and later corresponded with Pierre de Fermat on probability theory, strongly influencing the development of modern economics and social science. According to Sereny, Speers flawed character prevented him from ever admitting to the world that he knew about the assembly-line murder of Jews before the revelations at the Nuremberg Trials, even though he must have known about the final solution no later than Despite the knowledge that Sereny insists he had, Speer continued to serve Hitlers regime until the end.
